

Instruction Setup:

For setting up right after downloading the zip folder:

1. Open the SCSF-grp4 folder after extraction.
2. In your preferred IDE, open the **SCSF-grp4-CAMs folder**.
3. Go to the **src** folder, then select **CAMsApp.java** and run the application from here.
4. The program will start, follow the instruction prompted to login.
5. Refer to **csvdata/student.csv** or **csvdata/staff.csv** for the User ID and password to login.
6. After successfully login, follow the instruction to operate other relevant features.

General Guide:

1. Information will be stored in the staff.csv, student.csv, camp.csv under the csvdata folder.
2. Login with the relevant information for the selected user role.
3. Do a proper logout to save the updated details.
4. To find relevant downloaded reports, go to the reports folder.
5. To test for different application flows, refer to the report - Functional Test and Results Section.
6. The link to javadoc of the CAMs App can be found at **javadoc link.txt** under the SCSF-grp4 folder or the following link: <https://xaviathe2nd.github.io/>
